## Summary

B.Tech AI & Data Science graduate with hands-on experience in machine learning, data pipelines and full-stack development. Built and deployed a Random Forest model (88.1% accuracy), an asynchronous data pipeline processing 500+ records per run, and a MERN-stack application. Proficient in Python, SQL, Scikit-learn, FastAPI and React. Certified AI Programmer (NCVET, Govt. of India recognized, 300 hours). Seeking Software Engineer, Data Analyst, Data Scientist and AI/ML Engineer roles.

## Technical Skills

**ML & AI**: Scikit-learn, Random Forest, Supervised Learning, Feature Engineering, Model Evaluation, OpenAI API
**Data Analysis**: Python, Pandas, NumPy, EDA, Data Cleaning, Statistical Analysis, Data Validation
**Visualization**: Matplotlib, Seaborn, Power BI concepts
**Databases**: SQL, PostgreSQL, MongoDB
**Web & Backend**: FastAPI, Flask, REST APIs, React, TypeScript, Node.js, Socket.IO
**Tools & Deployment**: Git, Docker, Jupyter Notebook, Render, Vercel

## Projects

**JobHunter** | *Python, FastAPI, Docker, OpenAI API, Playwright* | GitHub **Jan 2026 – Jun 2026**

- Engineered a 5-stage async data pipeline processing 500+ records per run with LLM-based transformation and a deterministic validation layer.
- Integrated multi-provider LLM routing (OpenAI, Anthropic, Gemini) with fallback chains for fault-tolerant pipeline execution.
- Containerised 5 services with Docker Compose and secured inter-service REST APIs.

**HeatShield AI** | *Python, Scikit-Learn, Flask, React, TypeScript* | Live Demo **Dec 2025 – Jan 2026**

- Collected and preprocessed real-world environmental datasets, applying feature engineering and EDA before model training.
- Trained a Random Forest classifier achieving 88.1% accuracy and 98% recall on the Extreme class across 4 risk classification levels.
- Deployed the ML system on Render + Vercel, serving real-time predictions via REST API.

**CodeStream** | *React, TypeScript, Node.js, Socket.IO, MongoDB, JWT* | GitHub **Oct 2025 – Nov 2025**

- Built a full-stack application with Socket.IO real-time communication, MongoDB storage and JWT authentication.
- Examined data flows across 15+ API endpoints, verifying data integrity across 5+ user role scenarios.

## Experience

**Lytx (via TeamLease Services)** **Feb 2026 – Present**
*Associate* *Bangalore*

- Reviewed 100+ driving video events daily in a 24×7 production environment, identifying safety-relevant behaviours and classifying each event as per defined guidelines.
- Flagged events needing review and resolved the rest, maintaining 95%+ accuracy.

**Exposys Data Labs** **May 2025 – Jun 2025**
*Full Stack Developer Intern* *Remote*

- Verified data across 10+ RESTful APIs, running data quality checks on request/response payloads across 5+ user roles.
- Tracked 15+ defects across Agile sprints and documented findings.
- Reduced load time by 30% through query analysis and tuning.

## Certifications

**Artificial Intelligence Programmer** **January 2026**
*TN Skill Corporation | NCVET, Government of India Recognized* *300 Hours*

## Education

**Rathinam Technical Campus** **Nov 2021 – May 2025**
*B.Tech in Artificial Intelligence and Data Science | CGPA: 7.68/10* *Coimbatore*
